

Event management and safety support for councils and organisers

Most town and parish councils are expected to produce event safety documentation nobody ever trained them to write. Three ways to fix that, depending on how your events actually run — and I will tell you which one you need.

Annual Event Safety Partnership £500 / month

Year-round advisory partner, and the only option that covers the whole event rather than the medical side of it — event management plan, fire risk assessment, contingency planning, the lot. Master documents written once, a custom set for every event, reviewed annually. Best cover rate at 15% off. It pays for itself at about three events a year.

Event Medical Planning & Cover £500 / event

One event, the medical side done properly. Event medical plan, medical needs assessment, the medical scope of your risk assessment and emergency action plan, a written advisory summary — and me on site (10% off cover). Wider event management, fire and contingency planning stay with you. No ongoing commitment.

Cover & Document Review £100 / event

You write it, I check it. Expert review of the documentation your own team has drafted, with written feedback before it goes to committee, plus FREC 4 cover on the day (5% off cover).

DOCUMENTS I WRITE FOR PARTNERSHIP CLIENTS

- ☐ **Event Management Plan** — written to current guidance, specific to your site
- ☐ **Risk assessment and fire risk assessment** — site-specific, not downloaded templates
- ☐ **Medical needs assessment** — sized to your event, audience and duration
- ☐ **Emergency action and contingency plans** — including adverse weather and loss of comms
- ☐ **Martyn's Law readiness** and licensing / TEN support
- ☐ **Post-event report** — what happened, what to change next time

Start with a conversation — no charge

Tell me what your event calendar looks like and I will tell you honestly which of the three fits, or whether you need me at all.
